

Eversys Telemetry – IP/Port Pairs

Many firewalls do not only lock inbound connections but also outbound connections. That's why the IP/Port pairs of the telemetry servers are often needed.

It is necessary that the coffee machine can connect to all the servers in the table below ^[1] (Port 3306 and 80 => e.g. 188.226.144.129:3306 and 188.226.144.129:80).

URL	IP	Ports
eversys-telemetry.ch	188.226.144.129	3306, 80
telemetry-backup.ch	188.226.162.131	3306, 80
s1.eversys-telemetry.ch	178.62.141.134	3306, 80
s2.eversys-telemetry.ch	178.62.130.28	3306, 80
s3.eversys-telemetry.ch	178.62.128.184	3306, 80
s4.eversys-telemetry.ch	188.166.68.200	3306, 80
s5.eversys-telemetry.ch	188.166.104.118	3306, 80
s6.eversys-telemetry.ch	188.166.78.38	3306, 80
s7.eversys-telemetry.ch	188.226.220.174	3306, 80
s8.eversys-telemetry.ch	95.85.6.212	3306, 80
s9.eversys-telemetry.ch	128.199.48.119	3306, 80
s10.eversys-telemetry.ch	188.166.2.53	3306, 80
s11.eversys-telemetry.ch	178.62.208.26	3306, 80
s12.eversys-telemetry.ch	178.62.248.129	3306, 80
backup.eversys-telemetry.ch	178.62.242.52	3306, 80

^[1] Further servers will be added and this document will be kept up to date.
